## CÁNCER EN NIÑOS. ESTADÍSTICAS MUNDIALES

Este boletín deberá citarse como:

Cuba. Centro Nacional de Información de Ciencias Médicas. Biblioteca Médica Nacional. Cáncer en niños. Estadísticas mundiales. Factográfico salud [Internet]. 2020 Dic [citado Día Mes Año];6(12):[aprox. 16 p.]. Disponible en: <http://files.sld.cu/bmn/files/2020/12/factografico-de-salud-diciembre-2020.pdf>

## Reseña

Según la [Organización Mundial de la Salud \(OMS\)](#) el cáncer es una de las principales causas de mortalidad entre niños y adolescentes en todo el mundo. La [OMS](#) estima que cada año se diagnostica cáncer a aproximadamente 300 000 niños de entre 0 y 19 años.

Asimismo se afirma que en los países de ingresos altos, más del 80 % de los infantes afectados de cáncer se curan, a diferencia de muchos países de ingresos medianos y bajos donde la tasa de curación es de aproximadamente el 20 %.

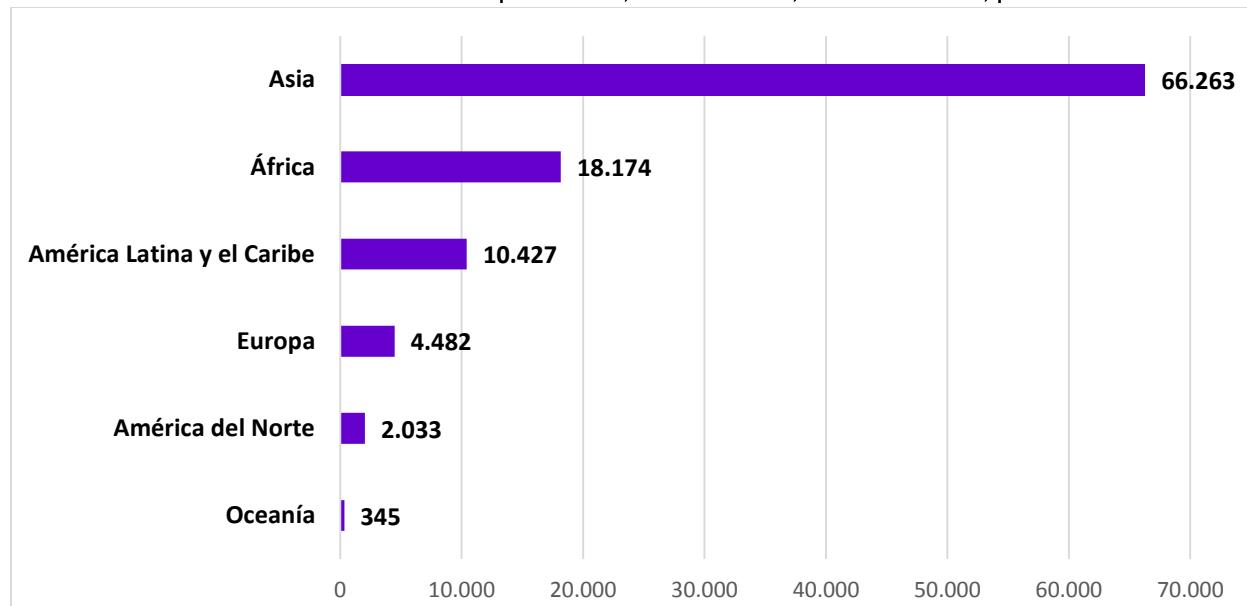

El boletín factográfico de salud ofrece en su edición del mes de diciembre de 2020, las estadísticas sobre mortalidad y morbilidad por cáncer en niños y adolescentes de entre 0 y 19 años a nivel global y en Cuba, de acuerdo con los últimos datos disponibles en el [Observatorio Mundial del Cáncer](#) y los [Anuarios Estadísticos de Salud](#) del [Ministerio de Salud Pública de Cuba \(MINSAP\)](#) en las ediciones de 2010 al 2019.

Al final del boletín se ofrece la bibliografía consultada para la obtención de los datos estadísticos.
